| 1. | With regard to the language , this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.

<input type="checkbox"/> This opinion has been established on the basis of a translation from the original language into the following language _____, which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)). |
| 2. | With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:

a. type of material
<div style="margin-left: 20px;"><input type="checkbox"/> a sequence listing
<input type="checkbox"/> table(s) related to the sequence listing</div>
b. format of material
<div style="margin-left: 20px;"><input type="checkbox"/> in written format
<input type="checkbox"/> in computer readable form</div>
c. time of filing/furnishing
<div style="margin-left: 20px;"><input type="checkbox"/> contained in the international application as filed.
<input type="checkbox"/> filed together with the international application in computer readable form.
<input type="checkbox"/> furnished subsequently to this Authority for the purposes of search.</div> |
| 3. | <input type="checkbox"/> In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished. |

International application No.

PCT/AU2004/001803

Box No. V **Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

1. Statement

Novelty (N)	Claims 1-66	YES
	Claims	NO
Inventive step (IS)	Claims	YES
	Claims 1-66	NO
Industrial applicability (IA)	Claims 1-66	YES
	Claims	NO

2. Citations and explanations:

Novelty

None of the citations in the International Search Report, individually, disclose all of the essential features of the claimed invention.

Inventive Step

D1: US 5,824,022

D1 discloses a cochlear stimulation system employing behind-the-ear speech processing with remote control.

D1 discloses a remote control that is connected via a radio link with the behind-the-ear (BTE) speech processor and issues the processor with control signals. Both the remote and the BTE speech processor contain a battery and user interfaces.

The only difference between the present invention and the cited prior art is the use of a radio link instead of a hard-wired solution. And this solution is also introduced by the applicant in Claim 11. Therefore the claims 1-66 do not involve an inventive step.
